PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 3.5+ years of experience building scalable, responsive, and accessible web applications using React.js, JavaScript (ES6+), TypeScript, HTML5, and CSS3. Skilled in component-based architecture, RESTful API integration, state management (Redux, Redux Toolkit, Context API), and React Router, with hands-on experience writing unit and integration tests using Jest and React Testing Library. Experienced in Agile/Scrum delivery, CI/CD workflows, and performance optimization (code splitting, lazy loading, memoization), with working knowledge of Next.js fundamentals and Figma-based design collaboration.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Sass/SCSS, Next.js (Fundamentals)

React Ecosystem: React Hooks, Context API, Component-Based Architecture, React Router, Redux, Redux Toolkit (RTK), Tanstack Query

Testing: Jest, React Testing Library (RTL), Unit Testing, Integration Testing

Web Development: RESTful APIs, Axios, Responsive Web Design, RBAC, Web Accessibility (WCAG/ARIA), Cross-Browser Compatibility

Performance: Code Splitting, Lazy Loading, Memoization (useMemo/useCallback), Bundle Optimization

Developer Tools: Git, GitHub, GitLab CI/CD, Postman, Figma, VS Code, Cursor, npm, Webpack, Vite, Chrome DevTools

AI Tools: GitHub Copilot, Claude, Cursor AI

Development Practices: Agile (Scrum), SDLC, Jira, Code Reviews, Debugging, Production Support

EXPERIENCE

Software Engineer

July 2022 – Nov 2025

Cognizant Technology Solutions

- * Developed and delivered new pages, feature modules, and UI enhancements for a centralized enterprise transaction management platform, translating evolving business requirements into scalable and user-friendly solutions.
- * Designed and implemented reusable React components, custom Hooks, workflow improvements, validation rules, role-based access controls (RBAC), and component-level customizations to enhance app usability, consistency, and business efficiency.
- * Leveraged React.js, JavaScript, TypeScript, HTML5, CSS3, RESTful API integration, React Router, and Context API alongside frontend engineering best practices to develop and maintain business-critical web applications.
- * Contributed to unit and integration testing using Jest and React Testing Library to improve component reliability and reduce regression defects, and collaborated with designers using Figma to translate mockups into pixel-accurate, accessible interfaces.
- * Contributed to GitLab CI/CD pipelines for automated build, test, and deployment workflows, and optimized performance via code splitting, lazy loading, and memoization to improve load times.
- * Performed debugging, error handling, testing support, QA coordination, production issue resolution, and deployment activities across the SDLC, ensuring application stability, reliability, and seamless release cycles.
- * Collaborated with cross-functional teams in Agile Scrum environments, participating in requirement analysis, solution design, QA validation, deployment activities, and delivery of business-critical application enhancements.

Key Highlights

- * **Zero post-deployment defects:** Consistently delivered clean production releases across enterprise feature rollouts through rigorous testing and deployment validation.
- * **Full SDLC involvement:** Participated in requirement analysis, development, unit/integration testing, QA validation, deployment activities, and production support across multiple enterprise releases.

PROJECTS

Gameverse App | React.js, JavaScript, Tailwind CSS, React Router, Context API, Vite

[GitHub](#) | [Live – Gameverse](#) | [Portfolio](#)

- * Designed and developed a React-based SPA leveraging component-based architecture, React Router, Context API, custom Hooks, and modern JavaScript (ES6+) to deliver a scalable and maintainable frontend solution.
- * Integrated REST APIs for dynamic data retrieval and state management, implementing loading states, error handling, and responsive, accessible user interfaces optimized across mobile, tablet, and desktop devices using Tailwind CSS.
- * Engineered advanced frontend interactions, animations, and navigation workflows while leveraging Vite for optimized build performance, fast development workflows, and production-ready application deployment.
- * Currently upskilling with Next.js fundamentals (SSR/SSG concepts) to extend the project's rendering and performance capabilities.

EDUCATION

Bachelor of Engineering in Computer Science

2018 – 2022

K.Ramakrishnan College of Technology, Trichy, Tamil Nadu
